

 **NORLOCK™**  
PVC PLANKING

A versatile and cost-effective PVC plank, uniquely designed for superior strength and durability, requiring no secondary reinforcement.

# **NORLOCK**™ PVC PLANKING

Norlock PVC Planking's custom-designed profile makes it a superior building solution for a range of agricultural and industrial uses and applications. It is primarily used in livestock facilities for both interior walls and pen partitions. Its structurally advanced construction features more plastic per square foot, making it ready for all types of use without any wood reinforcement, saving you money. This durable planking is able to withstand the extra weight of equipment, waterlines, feeders, and controllers fastened directly to it.

Norlock's easy-to-clean profile makes it useful for livestock penning, gating, inner divider walls, and interior walls.
