Residential Steel Roofing

A LIFETIME OF BEAUTY AND VALUE, ABOVE ALL

Since 1979, AGWAY Metals has been a leading manufacturer of premium quality steel building products. Initially founded to serve Ontario's agricultural market, AGWAY's reputation for progressive product innovation and customer service excellence have since expanded our industry leadership into the residential roofing market, as well.

From the traditional beauty of conventional stylings, to the sleek, modern lines of contemporary designs, AGWAY's broad range of residential roof solutions integrates the outstanding durability and protection of steel with stunning architectural aesthetics to complement any home or cottage and its immediate surroundings.

An AGWAY steel roof on your home or cottage adds beauty and value that will last a lifetime. And our longstanding reputation for outstanding, hassle-free customer service means you'll find us easy to do business with.

Advantages of Steel

For more than 30 years, AGWAY's field-proven steel roof solutions have provided significant economic and performance advantages in commercial and institutional applications. Now, residential homeowners can reap the same benefits for their house or cottage.

Longer Life

With a lifetime of 40 to 60 years, AGWAY steel roofs will last 3 to 4 times longer than conventional asphalt shingles.

Low Maintenance

AGWAY steel roofs are impervious to everything nature throws at them, including weather, pollutants, termites, moulds and other destructive pests; plus, they shed potential buildups of ice and snow.

Weather Durability

Steel roofing systems withstand high winds and severe weather conditions, including hail, moisture and extreme temperatures.

Environmentally Friendly

100% of the steel in AGWAY roofs is recyclable and most of our products are manufactured with some recycled steel.

Lightweight and Fast Installation

AGWAY steel roofs are up to 50% lighter than traditional roofing materials and can be installed directly over existing roofs without removing old shingles, which reduces waste and environmental pollution.

Non-Combustible

Being fire, spark and flame proof, an AGWAY steel roof will keep your home or cottage safer and contribute to enhanced fire ratings.

Many Profiles and Colours

Agway Steel roof solutions offer a rainbow of standard or custom colour options and finishes to complement and enhance your home's visual aesthetics.

AR Series

AGWAY's AR Standing Seam Profiles offer a raised rigid standing seam at three different depths and an assortment of widths to achieve a variety of contemporary, architecturally pleasing designs. Panels are installed using hidden clips and fasteners that produce a roof with clean, crisp lines. The side seams are mechanically seamed at either 90° or 180° for even more design flexibility.

NS Series

One of AGWAY's most popular profiles, NS is also one of our most economical. Nail Strip installs quickly and offers clean, contemporary lines with no exposed fasteners. To complete your home's overall curbside appeal, optional stiffening flutes and knee caps are also available. AGWAY's wide choice of colour options allows for virtual matching of any existing home or cottage.

SL Series

Snap-Lock is a visually stunning board and batten roofing solution designed to deliver a long-lasting performance. For a clean appearance, with no exposed fasteners, hidden clips, and knee caps, SL is an ideal choice for homes and cottages. Its unique, snap-in-place design means a new roof or retrofit can be done quickly and easily. A wide array of colours is available.

Century Rib

A more traditional roofing option, our Century Rib system is an exposed fastener profile that allows for quick and easy installation. This product's full range of colours and wide range of accessories offer rustic aesthetics, making it ideal for cottages and residences.

Springhouse Shingles

Springhouse Shingles provide a unique and spectacular looking roof with traditional appeal. Engineered with a textured finish to look like traditional shingles, Springhouse Shingles offer a rugged and long lifecycle that is maintenance free. Ideal for retrofitting historical homes, this product features concealed fasteners with no exposed cut edges, which keeps the traditional look consistent. Springhouse Shingles are available in seven designer colours in the KYNAR 500® Paint System, for a durable, fade resistant finish that will stand the test of time.

Available Colours

Colour is elemental in enabling us to express our individuality. From the way we dress to the surroundings we choose for our everyday lives, our colour preferences speak volumes on how we wish to be perceived. Whether that's a statement of quiet conservatism, bold presentation, or simple earthiness, it's nice to know Agway metal roofing products offer you a wide range of colour options to let you be who you are, while complementing the aesthetics of your home or cottage and its surroundings.

So, go ahead, chose the Agway colour that lets you be you.
