## PROJECT PROFILE

# 2945 DUNDAS STREET WEST

The compelling aesthetics of the condominium tower at 2945 Dundas Street West in Toronto were achieved using 3 of Agway's HF profiles; HF-12, HF-11, and HF-6. These profiles paired with the unique A606/Corten raw material finish achieved a rust-like elegance that truly sets this project apart from the surrounding brick and mortar structures.
