

**PROJECT PROFILE**

# FANSHAWE COLLEGE

A state-of-the-art hybrid academic facility designed by Diamond Schmitt Architects and Philip Agar Architect has opened at Fanshawe College in downtown London, Ontario.

The 10,600 m<sup>2</sup> (114,000 ft<sup>2</sup>) building transforms a historic department store into a vibrant urban campus to welcome 1,600 students, staff and faculty. Some of the original features and materials are incorporated in the newly built facility, which retains its street character fronting on Dundas Street.

The use of the HF-12 and HF-11 profiles along with a non-traditional colour selection of Telegray, Aluminum White and Umbra Grey provided a distinctive and exceptionally interesting design and colour mix.
